# 2023 highlights

## Strategic overview

- Auto Trader's core marketplace business **grew revenue by 9%, operating profit by 10% and maintained 70% operating profit margins**
- Our annual pricing and product event took effect from 1st April 2023, underpinning revenue growth expectations for the coming year
- The number of UK forecourts continued to be at record levels, with over 800 more retailers paying to advertise on Auto Trader than before the pandemic
- The number of visits continued to be significantly above pre-pandemic levels and were up 1% year-on-year
- We **completed the initial development of our Deal Builder product** with over 50 retailers trialling the service as at the end of March. Autorama losses were as expected and the integration is progressing well

## Group: net bank debt and capital allocation policy

#### Reconciliation of net cash/bank (debt) position<sup>1</sup> (£m)

#### Capital allocation policy

During the year, a total of 25.3m shares (2022: £0.8m). A further £77.7m (2022: £163.5m) before transaction costs of £0.7m (2022: £0.8m). A further £77.7m (2022: £73.6m) was paid in dividends, giving a total of £225.0m (2022: £237.1m) in cash returned to shareholders.

The Directors are recommending a final dividend of 5.6 pence per share. The total dividend for the year is therefore 8.4 pence per share (2022: 8.2 pence per share).

The Group's long-term capital allocation policy remains unchanged: continuing to invest in the business enabling it to grow while returning around one third of net income to shareholders in the form of dividends. Following these activities any surplus cash will be used to continue our share buyback programme and steadily reduce gross indebtedness. It is the Board's long-term intention that the Group will return to a net cash position.

# 2024 Outlook

## **Outlook for 2024**

The new financial year has started well and the Board is therefore confident of meeting its growth expectations for the year.

We expect another good year of retailer revenue growth, by far the largest part of our Auto Trader business. This will come from a similar ARPR growth rate to that achieved in financial year 2023. We expect the product lever to be consistent with the £137 achieved last year and the price lever to be slightly higher than last year's £90. The stock lever is likely to remain flat. We anticipate a slight decline in retailer numbers, mostly due to the full year impact of the disposal of Webzone Limited. The other revenue areas within the main Auto Trader business are likely to perform within a range of flat to low single digit growth.

Over time we aim to grow share in the new car leasing market through our new Autorama segment. Our short-term focus is on significantly reducing the current annualised operating losses of £15 million through deeper integration with Auto Trader and being disciplined on costs. Group central costs, which are non-cash and relate to the acquisition of Autorama, will be c.£18 million for the year.

Auto Trader operating profit margins should be consistent year-on-year at 70%, despite continued investment in product development and inflationary pressures. Group margins are expected to increase year-on-year.

Our capital policy remains unchanged, with the majority of surplus cash generated by the business being returned to shareholders through dividends and share buybacks.
